

Apex Advanced operates an extensive fleet of equipment specializing in the active intervention of oil and gas wells. The combination of Truck Mounted Gripper and Flushby services provides a uniquely efficient and economical solution that enables endless rod to be installed or removed without the need for a service rig and pressure truck. The addition of an Apex Advanced Endless Rod Welder, and a Coiled Tubing Unit enables comprehensive fishing and intervention capabilities.

KEY ADVANTAGES AND SUPPORT EQUIPMENT

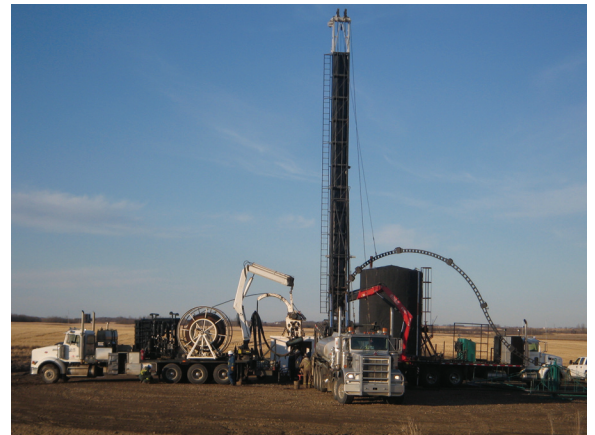

- Perform rigless intervention on endless rod
- Combination is capable of working on VERTICAL, SLANT and HORIZONTAL wellbores
- Tubing drains can be blown using the BOP
- Allows for fishing of the rod string and flushing of the tubing before welding broken rod
- All units can travel under 75% road bans.
- Apex Advanced leader cable is available to simplify reruns
- All units are available with ONE PHONE CALL
- Eliminate the requirement to have a service rig on location for endless rod related operations
- Dramatically reduce costs associated with endless rod servicing
