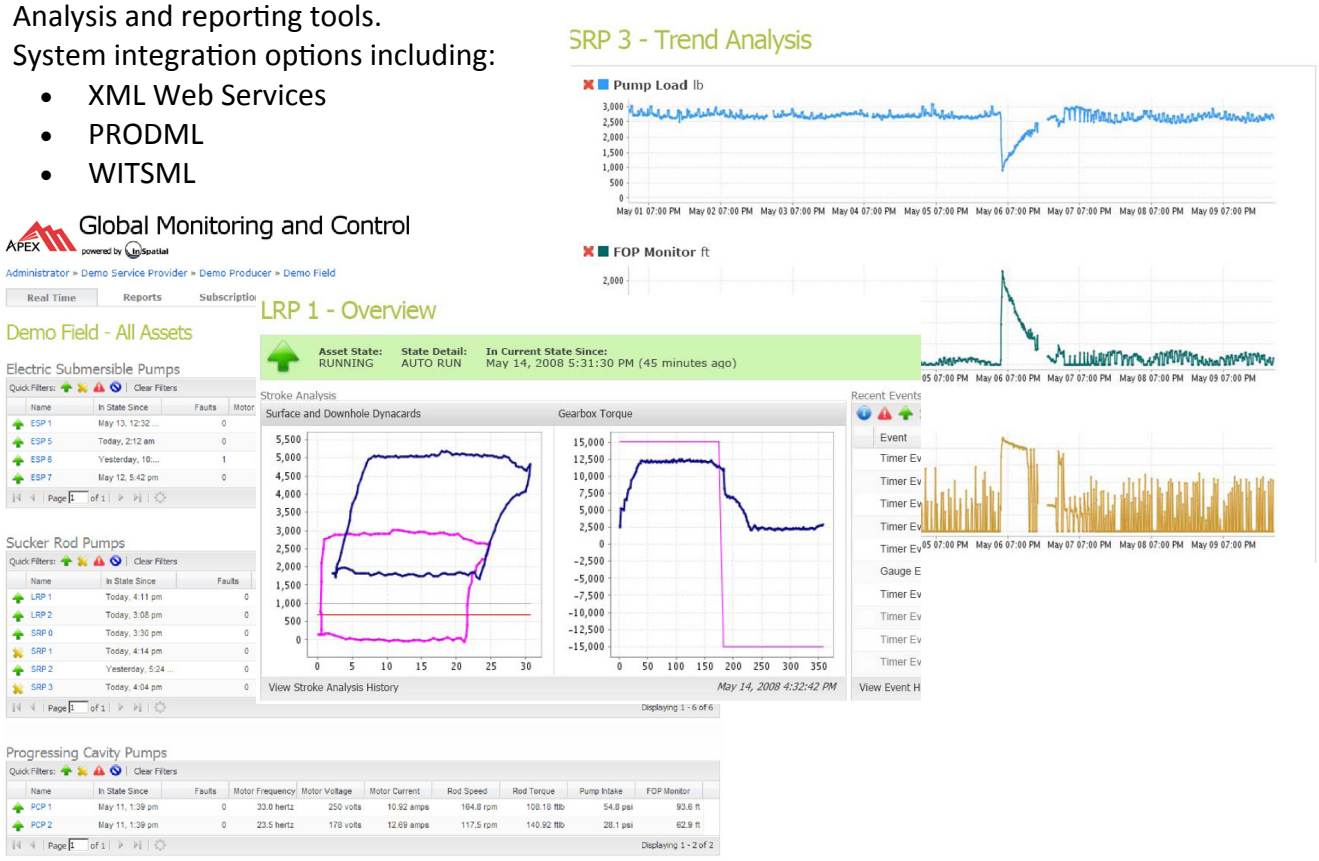
GLOBAL MONITORING AND CONTROL

The Apex Advanced Global Monitoring and Control System (GMC®) provides a hosted real-time data collection platform for remote monitoring of Apex Advanced Solutions - UNICO controlled wells.

GMC FEATURES:

- Hosted Web Application. Built on Oracle/J2EE platform.
- Support for all pump types, including: ESP, PCP, SRP, LRP and CRP.
- Operational and production data collection.
- Alarms and notifications.
- Analysis and reporting tools.
- System integration options including:
  - XML Web Services
  - PRODML
  - WITSML



The system can be deployed in a variety of configuration to meet both geographic and budgetary constraints.

Clustered

- Maximized use of cellular and satellite providers un-limited data plans.
- Can operate outside of cellular coverage areas.

Discrete

- Asynchronous access allows faster polling.
- Simplified field installation.

GMC dynamic views, group wells by selected criteria, which allow for effective management of large well deployments. With additional features such as custom grouping (e.g. by well type, by size, by geographic locations), quick summary of all running/faulted/offline wells.

All operational parameters are displayed on screen, including trends and graphs (such as downhole and surface dynacards).

GMC® is registered trademark of Unico® Inc.
