

MULTIFUNCTION WELLHEAD ASSEMBLY

Apex Advanced has partnered with an industry leader to distribute the MOST manufactured Multifunction wellhead. This wellhead setup includes a versatile Multifunction Flow-Tee Blow Out Preventer and Casing Bowl.

Multi Function Flow-Tee BOP Features:

- Manufactured from NACE material to meet API Q1-6A and ISO 9001-2000 specifications
- Built in pressure balanced stuffing box
- Built in side entry port for cleaning and foaming
- Side entry port
- Optional built in tubing rotator
- Environmentally friendly, very small foot print
- Minimal maintenance requirements
- Ease of cleaning of bottom hole casing side without interrupting production
- Save an estimated 7 hours of well downtime during servicing

Multi Function Casing Bowl Features:

- Casing Bowl is designed specifically for use with the Multi Function BOP
- Tapered ID to ease the entry of coil tubing during related servicing operations
- Designed to support the tubing hanger if the Flow Tee BOP ever needs to be removed.
- Tubing hanger can be positioned in the casing bowl and locked in place with the available lock down screws
- Includes 4" side outlet for easy foaming
