

PMM SURFACE DRIVEHEAD

Apex Advanced has partnered with an industry leader to distribute the MOST manufactured Permanent Magnet Motor Surface Drivehead. This premium drivehead is the ultimate in drivehead technology with respect to operational, maintenance and safety initiatives. It does not have any external moving parts, there are no belts, sheaves or external brakes. There is no polished rod and clamping system above the drive to be tightened as the drive shaft simply plugs into the multifunction wellhead.

Features:

- Simplified operation; requires minimum manpower
- Has no external moving parts
- Plugs into the rest of the MOST Multi Function system
- Total wellhead height including drivehead is approximately 7 feet
- Completely enclosed (no field restriction)
- Does not allow uncontrolled back-spin or torque
- Class 1 Division 2 explosion proof
- 97% energy efficient
- 35% less power consumption than regular electric motor
- Low noise emission
- No oil leaks
- Good overloading capability
- High/Low speed operations - 30rpm to 300 rpm
- High power to weight ratio
- High torque capacity
- Controlled over torque feature
- Smooth torque operations at high & low speeds
- Accurate torque control at 30rpm through 300rpm
- Automatic re-start capability when VFD sees back spin is finished
